

Cargo Bars

Cargo bars offer strong support for your cargo. Cargo bars expand to fit tightly against the sides of a container or truck walls and lock in place without excessive pressure. Moulded rubber feet grip the walls to provide excellent cargo holding ability.

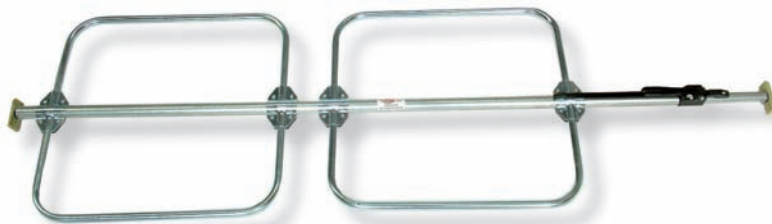

Designed to be used quickly and easily for various applications.

Hoop Set

Hoop sets are used for increasing the effectiveness of retaining small size packages over a large area. They are supplied in a set with two hoops and all hardware to mount to the cargo bars.

They can be located any where along the Cargo Bar.

One Way Lashing System

This one-way lashing systems offers a high strength yet economical method of lashing cargo when conventional lashing systems cannot be retrieved at destination for re-use.

This web lashing system is light and easy to use and has a 2000 kg lashing capacity. Webbing can be re-tensioned at any time. It also eliminates the damage caused by traditional steel strapping and eliminates disposal issues.

This product is ideal for securing products onto pallets or flatracks.

Pallet Grips

Pallet grips can be used to stop pallets moving around during transit. When placed between 2 wooden pallets, or between pallet and wooden floor, the weight of the load causes the teeth to 'bite' into the 2 surfaces, and stop them from sliding around.

These come individually shrink wrapped to a cardboard safety tag making placement safe and simple.

- Not recommended for loads under 500 kgs.
- Minimum of 2 pallet grips to be used.
