

Container Liners

Secure A Load can supply both full height and half height container liners. If your cargo requires protection from transferable dirt, rust or you just need to protect your cargo our container liners will ensure your products are protected. Containers are protected from contamination by odorous or wet cargo, whilst cargo is protected from dirt and rust that may be present on container walls.

Insulated Liners

The Insulated liner is a product specially designed to insulate shipping containers enabling the goods within to be protected from the dangerous temperature spikes witnessed during transit. This product is designed to protect wine and other temperature sensitive products significantly reducing the rate at which temperature fluctuates thus not allowing the dew point to be reached.

This Liner can be supplied both in 20ft and 40ft options and can also be supplied as pallet covers for smaller consignments.

Heat Control Blankets / Rolls

Lightweight, pliable insulating blankets that protect temperature sensitive cargoes from summer heat and winter cold. Consisting of one layer of polyethylene air bubble pockets with reflective aluminium foil laminated to one side.

- Easy to Install - Thin, flexible and lightweight, handles easily, installs quickly.
- Safe, Clean, Non-Toxic - Used since 1988 shipping perishable food products.
- Compact - Uses little cargo space.
- Reusable - Some customers commonly reuse blankets time and time again.
- Inexpensive - Cost effective even on short inland and one way exports.
