

### Truck Twistlocks

Secure A Load has available a wide range of truck trailer / chassis twistlocks from the standard left hand handle type, short handle type, long handle, screw down type which inhibits the container from shaking and rattling on the chassis. Individual parts are also available for the repair of twistlocks.

### Marine Stacking Twistlocks

Ideal for securing containers down when stacked on top of each other. Twistlocks are placed between the corner castings of the two containers and locked into position. Twistlocks are hot dipped galvanised and weight 5.8 kgs each. They have a 25 Ton SWL and 50 Tons BL.

### Rail Twistlock, Fully Automatic

Secure A Load can supply a range of twistlocks for use on rail wagons, our fully Automatic twistlock has been supplied to a number of rail wagon owners and operators in Australia and around the world, approved by the Association of American Railroads.
