

Secure A Load dunnage bags provide the most cost-effective solutions ensuring that your freight arrives at its destination damage free.

Dunnage bags are inserted into void spaces inside containers, rail cars or trucks. Once inserted, they are inflated with compressed air to the recommended level. This inflation serves to gently push the load away from itself, wedging it against other pallets or the outside walls of the container. This creates a solid brace, stabilising the load and preventing any future movement, thus greatly reducing the risk of damage during transit.

Disposable Paper Dunnage Air Bag

FOR WHEN RIGIDITY MEANS MORE THAN ELASTICITY

Available in 3 standard sizes:

- 900 mm x 1200 mm
- 900 mm x 2100 mm
- 1220 mm x 2100 mm

2-Ply and 4-Ply Paper Dunnage Bags

2-Ply Bags are recommended for truck and intermodal ocean shipments

4-Ply Bags are recommended for heavier truck and intermodal shipments as well as ocean going containers and vessel shipments

- Secure A Load paper dunnage bags are manufactured with high strength Polyethylene Liner and multiple layers of extensible kraft paper
- Fast-fill / quick release air valve for rapid inflation and easy deflation
- Higher burst strength than comparable bags produced by competitors
- Manufactured under ISO9001 certified conditions
- Manufactured to meet AAR specifications
- Subjected to stringent quality control measures
- Stocked in a variety of sizes
- Competitively priced
- Can be re-used
- Bags adapt themselves to almost any shape, space or void, so they are useful for all types of loads.
- Environmentally friendly
