Ty-Gard

Ty-Gard's flexible restraint system design prevents load shift by absorbing and dissipating the energy of transport forces without incurring damage to the products. Ty-Gard offers a complete WOOD-FREE solution for the securement of your products. Ty-Gard has been impact tested and approved by the AAR and is recommended for shipment of dangerous goods.

Void Gard

Void Gard is a revolutionary new lateral cargo restraint device that is safe and simple to use. Void Gard prevents lateral shifting by filling the exact voids between cargoes. Void Gard is an adjustable, costeffective and practical system that allows shippers to fill a variety of void spaces and is reuseable.
